City Manager Message

As we're heading into 2024, the City and Mayor Brandt Rydell recently took some time to reflect on the achievements made in 2023.

Mayor Rydell recently gave his annual State of the City Address during the February Taylor Chamber of Commerce luncheon. In this address, Mayor Rydell outlined our city's accomplishments, outlined our vision for the future, and addressed key issues facing our community. It serves as an important communication tool to

keep residents informed and engaged in our city's progress. If you were unable to attend and missed the address, you can view a recording here:

<https://youtu.be/h7NXNPBBZIQ>

The City has also recently released the 2023 Annual Report. The Annual Report encapsulates the progress, achievements, and challenges our city faced over the past year. It provides valuable insights into our initiatives, projects, and the impact they have had on our community. Whether you're interested in our economic development efforts, infrastructure improvements, or community programs, this report offers a comprehensive overview of our city's endeavors. View the 2023 Annual Report here: www.taylortx.gov/1055/Annual-Reports

Your involvement and interest in the future of our city are invaluable. By staying informed and engaged, we can continue to work together to make our community an even better place to live, work, and thrive.

Sincerely,

Brian LaBorde

City Manager

Wastewater Averaging Period

For residential customers with a City of Taylor utility bill, the City bases monthly wastewater charges on the average water consumption for November, December, January, and February. The three lowest consumptions are then averaged and used to calculate your wastewater charge for the entire year. An account must be active the entire four months to establish an average. All new accounts will be charged the new customer average until the account has established its own winter average.

Prior to the averaging period, residents are advised to repair leaky faucets, running

toilets and any other water leaks. This will avoid a high usage month during the averaging period and help keep your sewer rate down. Averages cannot be adjusted for lawn watering or pool filling.

For commercial wastewater customers, charges are based on actual monthly water consumption.

If you have any questions about the wastewater averaging, please contact the City's Utility Billing Department at 512-352-2066
