

Taylor Drainage Master Plan Virtual Public Meeting

<https://taylordrainageplan.halff.com/>

The City of Taylor has a history of flooding and erosion concerns due to inadequate drainage and increased urbanization. The City has requested Halff Associates to prepare a Drainage Master Plan that will result in a plan to more effectively address drainage improvements. This virtual forum is an opportunity for residents to provide input that will be used to identify concentrated areas of flooding concerns. Residents are able to virtually enter the room, visit informational station, and click on a map to provide comments and upload photos that we will receive in real time.

Questions about the study or the virtual public meeting can be directed to Katherine Smith by email at ksmith@halff.com or at (512) 777-4623.
